The ECOFROG Project

The ECOFROG project, the leading brand of Servipro 2.0, S.L., was created to meet the increasing demand of our society in recent years: the creation of eco-friendly cleaning systems, which are also healthy for users.

Through **O₃zone**, the exclusive ECOFROG cleaning systems are not only eco-friendly and care for users' health, but their main aim is to clean, degrease and disinfect.

The business project was initially started up for the domestic sector. As a result of its success, for the past two years, we have been able to develop towards other professional sectors, with different needs and demands. As a result of the knowledge acquired on **O₃zone**, and once the urgent needs of many professional sectors were detected regarding ECOfriendly, healthy cleaning and disinfection, Servipro 2.0, S.L. has started a long-term project to become a benchmark operator and a clear exponent in the development of **O₃zone** technology, not only in Europe, but in other areas of the world.

Our know-how and experience with **O₃zone** enables us to be present in all possible areas of application, and above all, in the entire value chain, from the design of machines to their maintenance.

As developers and exclusive worldwide distributors of the new model AVATAR, launched in January 2020, we now have the opportunity to promote the ECOFROG project at international level, to places where we have been present with previous models. Our project is hence at a crucial stage of searching for partners, in any corner of the world.

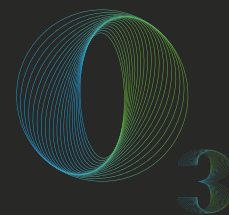

ECOFROG launched, WITH WORLDWIDE EXCLUSIVITY, a new model called AVATAR. This model signifies development and improvement compared to the latest systems of **O₃zone** generation in water.

- > Capacity to work with hot water up to 35°C.
- > Double integrated water outlet for a larger number of applications.
- > Improved performance with greater ozone stability.
- > New LED display with more information.
- > New, more elegant and exclusive design.
- > Lighter in weight.

ECOFROG'S MIND IS A GREEN FUTURE

REDUCE | REUSE | RECYCLE

CHANGE

Welcome to the (R)EVOLUTION

Model:	Avatar
Input / Electrical consumption:	AC 100 - 240 V/50 - 60Hz
Output / Electrical power:	DC 12V 3A
Ozone level (3 levels):	100% - 50% - 0%
Maximum effectiveness of O₃ zone in water:	2 hours in open container ⁽¹⁾ 5 hours in a closed container ⁽²⁾
Water flow:	2.5l/min - 6l/min
Optimum water pressure range:	14.5psi
Maximum allowed water pressure:	50.8psi
Operating temperature:	Water 5~35°C
O₃ zone concentration:	0.5 - 1.2mg/l
Product dimensions:	38 cm x 25.5 cm x 8.1 cm
Net weight:	2.8 kg

⁽¹⁾ Bactericidal activity test - fungicidal nº 500872 - 501060 carried out in the laboratory by ACONSA

⁽²⁾ Bactericidal activity test nº 506896 - Ozone effectiveness at 5h of production in closed container carried out by ACONSA.

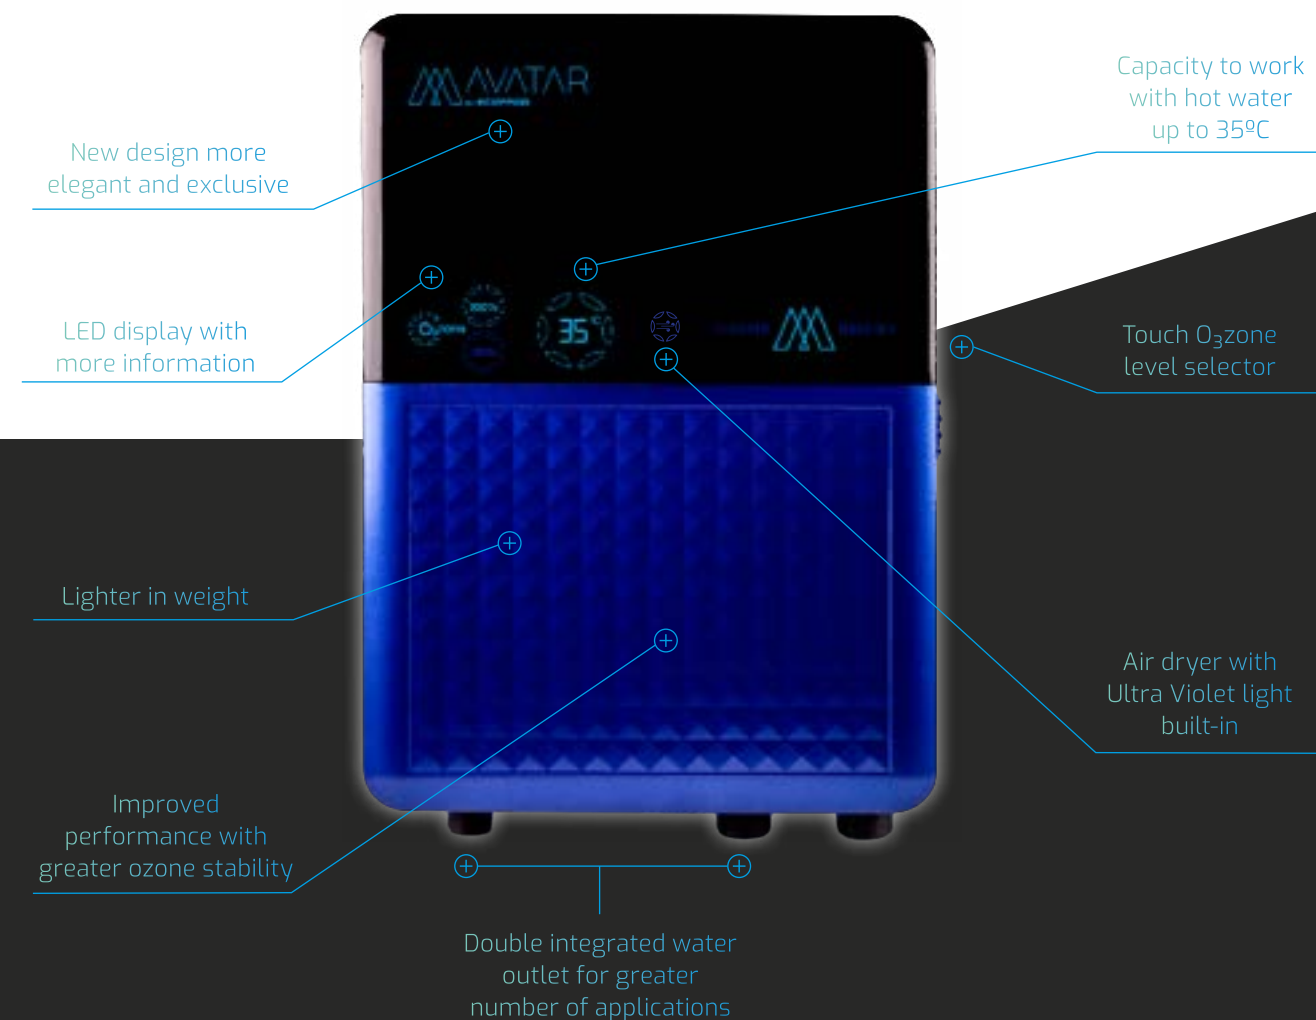

The biocidal action of the ozonated water generated by Avatar eliminates all viruses, fungi and bacteria⁽³⁾ from any material and surface. Additionally, it does not store water, which means that it both purifies and uses water to avoid second contamination owing to storage.

Avatar can work with hot water up to 35°C and has three levels of ozone; high level (100%), low level (50%) and a non-ozone level (0%). These are controlled by the touch button on the right-hand side of the machine.

Avatar carries out the following main functions:

- > Viricide, bactericide, fungicide, antiseptic, disinfectant, degreaser and deodorizer.
- > Decontaminates and purifies.
- > Cleans and softens.
- > Saves energy and protects the environment.
- > Consumes in an intelligent and reduced manner.

⁽³⁾ Standard accreditation UNE-EN 13697:2015 + A1:2020 (bactericidal, fungicidal) and UNE-EN 14476:2019 + A2 (viricidal) Bactericidal activity test nº 492324 carried out in the laboratory by ACONSA at a maximum water temperature of 35°C.

1 System > 2 distribution channels: industrial/professional + domestic

The efficiency of the ECOFROG system applied to domestic use, thanks to its exclusive, patented **O₃zone** technology, has led to the project being developed in other more professional channels and areas, with different needs and requirements, for a highly varied sector, towards ECOfriendly, healthy cleaning and disinfection. **Hotels, restaurants, hospitals, schools, nursing homes, laundries, spas, gyms and other businesses** are now benefiting from this technology.

More applications than ever for DOMESTIC USE

- > Laundry connecting AVATAR to the domestic washing machine.
- > Cleaning and disinfection of all types of surfaces: floors, walls, glass and furniture of any material and in any room, along with bathrooms, tiles, sealing and partitions.
- > Cleaning and disinfection of extractor hoods, ovens, inside refrigerators, kitchen sinks, worktops, cookers, fryers and any type of household appliance.
- > Cleaning and disinfection of any type of room or surface, which was previously cleaned using chemical products.

For a better tomorrow

Guaranteed cost effectiveness in applications for PROFESSIONAL

Specialized in the HORECA sector, AVATAR is a ECOfriendly system for the catering industry, which **generates added value for businesses** and eliminates the use of 80% to 90% of chemical products (with its consequent plastic containers). This simplifies purchase orders of cleaning products and their storage, thereby reducing occupational risks and absenteeism owing to these products and saving costs.

- > Cleaning and disinfection of all types of surfaces: floors, walls, windows and furniture of any material and in any room, along with bathrooms, tiling, sealing and partitions.
- > Cleaning and disinfection of extractor hoods, ovens, inside refrigerators, cold stores, kitchen sinks, worktops, stainless steel work tables, cookers and any type of household appliance.
- > Cleaning and disinfection of any type of surface which was previously cleaned with chemical products.
- > Cleaning and disinfection of cutlery, glassware, dishes and all kinds of utensils.

WASH
by ECOFROG

The perfect complement for industrial dishwashers

With the Wash by Ecofrog add-on you can use Avatar in **industrial dishwasher systems** without the need for detergents.

Use it for everything

With Avatar you save 99% of chemicals for cleaning and disinfecting any surface and room in the home. Get a healthier and more environmentally friendly home thanks to the Avatar 100% Ecofriendly system.

*Connect Avatar
to your washing
machine!*

The AVATAR model is promoted and fully owned by ECOFROG. This means that Servipro 2.0 S.L. has worldwide commercial exclusivity.

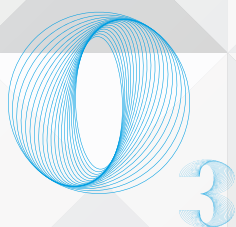

The expansion model in the world of Ecofrog is structured through the presence of **exclusive local distributors** in the different territories in which the brand is present.

In this way, we intend to coordinate the experience and know-how of Servipro 2.0 regarding the ECOFROG cleaning and disinfection system with **O₃zone**, along with specific knowledge of the market in the areas of action of our exclusive distributors.
